Artists information

Kerry Sage

Kerry is driven to explore two key themes in her artistic expression. City and industrial impact or studies in wilderness locations from her time in North America.

Some of Kerry's abstract works render vast areas of untamed bull rushes in northern Minnesota; sunsets in the badlands of South Dakota or mass bird migrations witnessed in Canada, while others are driven by dense city landscapes.

The common thread in all her work is a balance of colour and form driven by these influences. This is her first exhibition in the UK since returning from 5 years of studies in North America."

John Damsell

John specializes in highly detailed property and portrait, and all wild and domestic animals, working in pastels watercolour, oils, acrylic, coloured pencils and graphite. Johns says:-

"I think my favourite are watercolours"
